

Lab-01

1. Determine the perimeter of an object by using 4 connected neighborhoods and 8 connected neighborhoods.

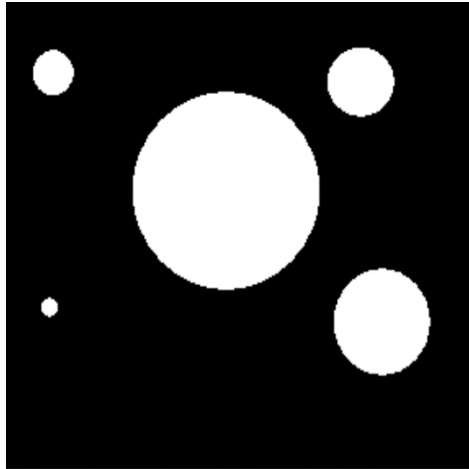

Fig. 1

2. Create a binary image using a threshold.

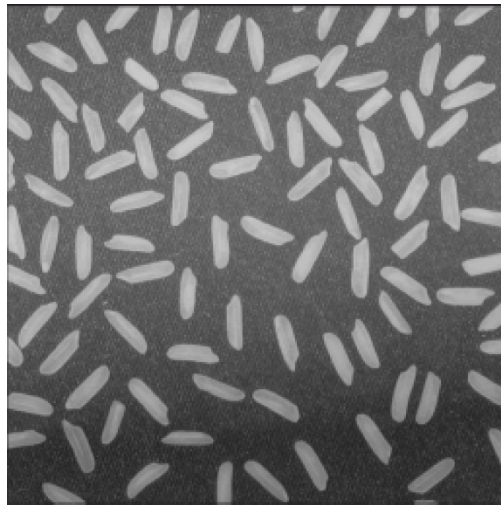

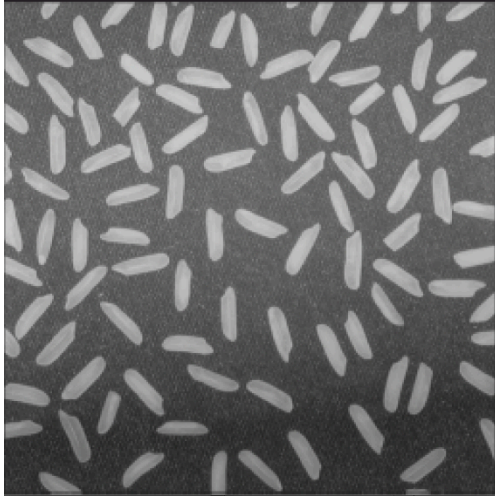

Fig. 2

3. Determine the number of objects in the binary image generated in Question 2 using the concept of connectivity.
4. Find the Euclidean distance between two points of the image.

5. Apply the following operations using Fig.1 and Fig.2:
 - a. Addition
 - b. Subtraction
 - c. Multiplication
 - d. Division
6. Apply the following operations using Fig.1 and Fig.2:
 - a. AND
 - b. OR
 - c. NOT
7. Adjust the contrast of the following image.

8. Brighten the following image

9. Quantize the Grayscale image by 8 levels.

10. Find the digital negative of the image.
